
Inputs
Compiled design, open or closed
Host program
Operator probes
Prompt length
Analysis
True
Name
Order
Dependence graph over every agent
Legality conditions
A bound per false dependence
Rewrites, each behind a checker
✓ Composer Reorder across operators
✓ Stream pass Reorder within a stream
✓ Loop pass Rename into rings
Event model
Order and configuration per prompt length
Output
Rewritten design on its own hardware context, or a refusal with its reason
Probes, prompt length
